[in Profile](#) [🔄 Profile](#)

I think some of the most important traits are being a hard worker and lifelong learner and I embody both of those. You cannot always know everything but you can learn anything you want.

SKILLS

Web Development

html | css | javascript | mongodb |
handlebars | react | jquery | chartjs | php |
blaze | wordpress | bootstrap

WORK EXPERIENCE

Web Developer at Signet Research **November 2016- Current**

<https://sibylsurveys.com>

Developed an advanced surveying web app, from the ground up, using MeteorJS. The surveying platform has features that compete with companies such as Qualtrics and SurveyMonkey.

- Created an API that mimics most of the core web apps functionality
- Used Mocha with Chai to write complete test coverage
- Worked on several independent workers in Node to process and reduce load from core app to maintain optimal performance for intensive tasks
- Designed and created the website to that is used to sell the platform to potential clients
- Optimized MongoDB database schema and put in place advanced schema tools using simpl-schema

Web Developer and Creator at MMA Theory **May 2017- Current**

<https://mmatheory.com>

Created a website to analyze Mixed Martial Arts (MMA) results and draw statistic based conclusions.

- Gathered a complete and accurate database of all recorded MMA fights to date
- Created statistical models from concepts to display correlations between past events and upcoming events
- Used ChartJS to display statistical information in an engaging way.

Web Developer at Obstacle Racing Media **May 2015- July 2017**

<http://obstacleracingmedia.com>

Within one year doubled the traffic in every metric and significantly increased performance in areas such as bounce rate, time on page, and returning visitors.

- Reduced page load time from 7+ seconds to under 3 seconds
- Conceived SEO standards and best practices for an open pool of contributors
- Built a web store that worked with 20+ drop shippers and automated, no inventory, shirt printing
- Created a customized calendar using JavaScript and PHP to display geo located results without user interaction
- Designed all creative graphics in Adobe PhotoShop and Adobe InDesign for articles and promotional materials

Visual Content Manager at Spartan Race **February 2014- January 2015**

<https://spartan.com>

Managed and created digital assets across the brand.

- Created a system to manage over 500k photos with metadata in a digital asset management platform
- Designed images for promoting races, events, and products
- Photographed products and events to provide promotional quality photos beyond standard event coverage images

Photographer and Editor at New York Stock Exchange **January 2010- June 2014**

<https://nyse.com>

Photographed all events and guests ranging from heads of state visiting the trading floor to global brand promotions for IPO's.

- Provided photo coverage of the large events in entertainment and news, while being able to continually adapt to a variety of environments
- Responsible for editing large quantities of images and inputting metadata for prominent live events
- Maintained an active archive with metadata while handling client requests in a 24/7 news cycle
- Worked directly with clients and other photographers to meet and exceed expectations
